

What is Journey Mapping and How to Use it Well

The customer journey is the step-by-step process a prospect takes to become a customer. This journey isn't measured in miles but interactions with your company. From a social media post, search query, or website visit to a blog article, sales conversation, or customer support call; every interaction nudges the prospect forward through the sales funnel and - if you do it right - all the way to customer loyalty. The customer experience is how a customer feels about all these interactions.

THE CUSTOMER JOURNEY IS GROWING MORE COMPLEX

86% of Shoppers

use more than one resource to shop, such as blogs, reviews, social media, catalogues and in-store browsing

The number of interactions between customer and company during the customer journey increases by about

20% each Year

THE CUSTOMER EXPERIENCE IS MORE IMPORTANT TO BRAND SUCCESS THAN PRICE AND PRODUCT
